

# Roasted Chicken **Cutter**

Innovative, fast and safe way to cut roasted chicken

## Safe

- the movement of the cutter is automatically controlled
- two-handed control unit
- only a single operator
- Emergency stop is activated whenever the operator ceases to press one of the buttons

## Silent

Extremely quite as it uses an electrical system without any hydraulic or pneumatic components

## Fast

Reduced cutting time, the chicken is cut in a single movement

## Easy to use

## Easy to install

It requires only a single-phase supply

## Economical

Consumes 0.25kW

## Easy to clean

To clean the blades, simply remove the cutter (no tools needed), wash in the dishwasher or wash with a suitable cleaning product and rinse off under running water

## Well-presented final product

The blades cut in a single and precise movement, so the chicken looks really good
